PROFILE

Data Science graduate with hands-on experience in Machine Learning, Exploratory Data Analysis, AI-powered applications, Generative AI, and AI agents. Experienced in developing practical data and AI solutions using Python, machine learning techniques, document processing, APIs, and agentic AI frameworks. Completed a Machine Learning internship involving data analysis, feature engineering, model evaluation, and content performance prediction. Interested in building intelligent, automation-focused applications that solve real-world problems.

EXPERIENCE

Machine Learning Intern — FlyRank

July 2026

- Developed and experimented with AI agents for automating research, analysis, and task-oriented workflows.
- Worked with Model Context Protocol (MCP) to connect AI agents with external tools and data sources.
- Built tool-integrated AI workflows that enabled agents to retrieve information and perform tasks through connected services.
- Applied Python, Machine Learning, Generative AI, and agent-based workflows to practical projects.
- Performed EDA, feature engineering, and model evaluation on real-world datasets.
- Analyzed content performance metrics including search volume, impressions, CTR, and ranking-related features.

Research Assistant — Data Science & Machine Learning

Jan 2026

- Conducted research and practical analysis in Data Science and Machine Learning
- Worked with data preprocessing, exploratory data analysis, feature engineering, and machine learning techniques.
- Assisted in analyzing datasets and interpreting results for research-related tasks.
- Applied Python and machine learning tools to support data-driven research and experimentation.

PROJECTS

AI Resume & Job Application Agent

- Built an AI agent designed to analyze resumes and job descriptions.
- Implemented skill-gap analysis, candidate-job matching, cover-letter generation, and interview preparation.
- Used Python and LLM-based agent workflows to automate recruitment tasks.

Weather MCP Application

- Developed an AI-powered weather application using an external weather service.
- Integrated tool-based functionality to retrieve and process weather information.
- Designed the application to provide useful weather information through an AI interface.

JobFlow ETL Pipeline

- Built a Python-based ETL pipeline for extracting job listing data from APIs.
- Cleaned, transformed, and normalized job data using Python.
- Stored processed data in SQLite and CSV formats.
- Implemented logging to monitor ETL execution.

SKILLS

- Python, FastAPI, REST APIs
- PostgreSQL, MySQL, Vector Databases
- AI Agents, LLMs, Generative AI, RAG, MCP
- Machine Learning, Data Analysis, EDA, Feature Engineering
- Prompt Engineering, Tool Calling, Agentic Workflows
- CrewAI, n8n, Git, GitHub, VS Code

EDUCATION

Bachelor of Science in Data Science

2022 – 2026

Khawaja Fareed University of Engineering & Information Technology (KFUEIT), Rahim Yar Khan
